

Bant Boru is the leading company in brake and fuel line production with its own technology. The goal of Bant boru is to increase the market share in automotive and white goods industry by the collaboration with different companies in different countries.

#### In this Direction;

- In addition to the implementation of our "zero defect" strategy, reducing the costs of poor quality while producing the right product at the first time, it prioritizes the awareness that quality should be produced rather than control, and the desire for continuous improvement to be adopted by all parties.
- Prioritises customer satisfaction and product safety with capable employees. It aims to develop brand awareness and ensure that employees are in common and essential goals.
- Guarantees continuous quality system which meets customer needs and expectation with a customer oriented approach.
- Aims extension of innovation and design quality for all valued product and processes and with this aim, cooperates with sectoral indicators .
- Aims to comply with contract terms, customer specific requirements, legal regulations and mandatory standards.
- Aims to continue that continuous improvement activities as an important element of the company culture, with the participation of all our employees, with risk-oriented process analyzes and development studies.
- Aims to make the achievements made within the framework of our quality policy, sustainable and move them to higher levels.
